

Video Console Plus II

Overview:

It is great to announce that the upgraded version, **Video Console Plus II** (a 1080P Video to VGA Converter) is available now. With it, you can connect it to your video source devices such as DVD player, video camera or video game to your VGA monitor with outputs up to 1920x1080. Also its new powerful POP (picture on picture) function allows you to use your computer as usual while monitoring the video input. As it is easy to connect your video source without any software installation, don't you think it is worth for you to place an order with us?

Video Console II

(A Video to VGA Converter for High Resolution **1920x1080** Video, Picture)

A composite image featuring a man in a white shirt sitting at a desk with a computer monitor. A blue ribbon graphic with the text "High Resolution 1920x1080" connects the monitor to a Video Console II device. The device is shown with a remote control and an arrow pointing to its "S-Video/Video Input" port. To the left of the device are several feature icons: "Video to VGA converter", "1920 x 1080 High Resolution 1920x1080", "Video S-Video Video / S-Video Input", "VGA Input", "POP Function", and "multi languages (UK/DE/FR/ES/IT/NL/RU/JP)".
