

# PROTECT APEX IP™

Activate IP functionality for  
PROTECT M80™ and PROTECT M90™

PROTECT APEX IP™ is a digital activation service that enables IP connectivity for the PROTECT M80™ and PROTECT M90™ fog cannons. By activating IP functionality, these fog cannons can be monitored via the IntelliCloud platform, enhancing security management and reducing the need for on-site inspections.

## Features of APEX IP & IntelliCloud

- APEX IP enables IP connectivity for the PROTECT M80™ and PROTECT M90™ fog cannons.
- By activating IP functionality, these fog cannons can be monitored via the IntelliCloud platform.
- Users can enable IP functionality at the time of purchase or later, depending on their security needs
- The ability to view all connected fog cannons in a centralized dashboard ensures faster troubleshooting.
- Order at your local distributor or installer to get started with APEX IP
- Seamless integration with IntelliCloud for remote monitoring.
