

PROTECT M80™/M90™ Mounting metal plate

Our specialized mounting metal plate, featuring a convenient click mechanism, simplifies attaching the PROTECT M80™ and M90™ fog cannons. This durable plate ensures robust support and optimal placement, delivering maximum effectiveness and stability.

Secure attachment

The sturdy metal plate offers a solid foundation for mounting the fog cannon, ensuring it is firmly anchored to the ceiling or wall to prevent any movement or displacement during or after installation.

User-friendly & durable

Using the mounting plate provides a straightforward and quick installation process. Made from high-quality metal, the mounting plate withstands the fog cannon's weight and stresses over time. Its durability ensures long-term reliability.

Specifications:

- Dimensions: L: 30 W: 22 H: 1.2 cm
- Weight: 1.3 kg
- Material: Galvanized steel
- Compatibility: PROTECT M80™ & PROTECT M90™

Mounting your Fog Cannon™

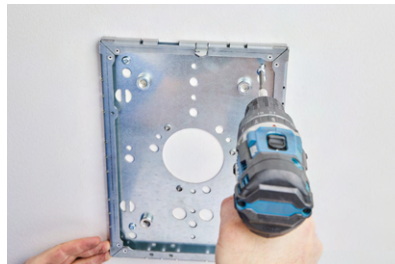

Ensure secure and effective installation of your fog cannon with these easy-to-follow steps. Depending on whether you're attaching it to a wall, ceiling, or beam, or suspending it from the ceiling, follow the appropriate section below.

Choose appropriate mounting holes based on whether it's for a flat or uneven surface, or if it will attach to a beam.

Vertical Surface (Wall): Ensure the hook on the mounting bracket is positioned at the top.

Horizontal Surface (Ceiling): If mounted near a wall, the hook should be oriented towards the wall.

Identify and mark the spots for drilling. Use a pencil or marker. Drill the marked positions and get them ready for the screws.

Attach the mounting bracket to the wall, ceiling, or beam using screws.

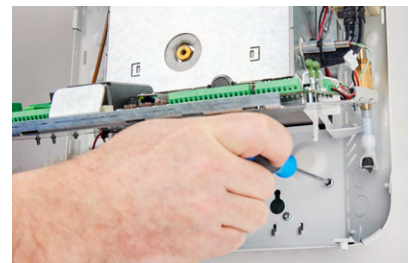

Suspending from the ceiling using the bracket: Attach wires: Use the semicircular holes at the four corners of the bracket to secure the wires. Attach threaded rods: Use the M10 press nuts or adjacent holes to fix threaded rods at the four corners.

Attaching the Fog Cannon™ to the bracket: Align the hooks on the back of the fog cannon with the edge at the bottom of the mounting bracket.

If mounted on the ceiling, position the hooks into the four holes on the bracket flange for stability. Push the top of the fog cannon over the hook on the bracket until it clicks into place.

Use two screws to firmly secure the Fog Cannon™ from the inside, at the top left and lower right corners.
