

APEX Fog Fluid Box

For PROTECT M80™ & PROTECT M90™

PROTECT M80™ and PROTECT M90™ introduce the effective Bag-in-box fog fluid solution. This system simplifies the process of changing fog fluid in the new fog cannons. The solution consists of a practical cardboard box and an inner liquid bag, designed for easy disassembly and disposal. The new Fluid Box ensures maximum utilization of the fog fluid in the box.

Features of APEX Fog Fluid

- Disposable cardboard packaging, which makes recycling easy
- Contains enough fluid for 4 full shots for PROTECT M80™ and 3 full shots for PROTECT M90™
- Bag-in-Box system that enable quick and easy change of fluid with minimal spillage
- Automatic detection of fluid chip without attaching any cables
- The new fluid system is only available for PROTECT M80™ and PROTECT M90™
- The plastic/aluminium bag reduces fluid evaporation compared to a bag exclusively made from plastic

Specifications

Full shots in one container:
4 full shots for PROTECT M80™
3 full shots for PROTECT M90™

800 ml fluid

Box material: Cardboard

Bag material: Plastic/Aluminium (PET12 / ALU7 / NY15 / LDPE100)

Disposable packaging

Wireless fluid chip

Dimensions (mm): L: 145 W: 110 H: 70

Weight: Approx. 0,9 kg

Printing errors expected. Subject to changes to technical data.
